## General information and explanatory notes (retain for future reference)

### **What are the benefits of transferring a Licence to Take and Use Surface water and Operate Works?**

Transferring surface water entitlement provides existing licensed water users with the opportunity to maximise the value of their licence by selling their unused entitlement, and provides others with the ability to purchase water entitlements in areas where new entitlement is not available.

### **What are the rules relating to the permanent transfer of a licence?**

Rules have been established which allow the permanent transfer of surfacewater entitlement. These rules and policies are issued and updated from time to time by the Victorian Minister for Water. The following general rules apply to permanent transfer of a licence to take and use surfacewater:

- Transfer of a licence is not permitted to or from farm dams unless there is a standard Licence to Take and Use Water has been issued. A registration licence can be converted to a standard Licence upon request to GMW. Please contact the Licensing Unit for further information.
- If a licence has been issued with a winter-fill condition, it cannot be transferred to a licence which has been issued as an all-year licence.
- All transfers into unregulated sub-catchments are subjected to an assessment against the sustainable diversion limit to determine whether they can be permitted. If your sub catchment is fully committed you will only be allowed to transfer from another licence within your sub catchment.
- Water cannot be used by the buyer until the transfer has been approved and GMW has notified all parties in writing.

Additional rules may apply to an individual catchment as a result of local management rules established under a Water Supply Protection Area. Water Supply Protection Areas are declared to protect the water resources of surface water catchments, groundwater aquifers or both and aim to provide a balanced and sustainable sharing of stream flows between all water users in unregulated systems.

### **How do I know which trading zone and trading rules apply to my licence?**

The trading zone applicable to your licence is listed on your licence document and can also be obtained by contacting the Licensing Unit (fees apply). Trading zone rules and other information relating to trading is available from [www.gmwater.com.au](http://www.gmwater.com.au). Rules relating to trading are also contained in the *Policies for Managing Take and Use Licences - consolidated 21 Sept 2010* issued by the Victorian Minister for Water. This document can be downloaded from the Victorian Water Register website at [www.waterregister.vic.gov.au](http://www.waterregister.vic.gov.au). If you cannot access the internet please contact the Licensing Unit to request a copy by email, mail or fax.

### **Where can I get more information about trading opportunities and current prices in my area.**

You should visit the GMW website to obtain information about trading rules and restrictions applicable to your licence before proceeding to locate a buyer or seller for your licence volume. If you are still unsure about the rules you should contact the Licensing Unit to discuss your proposal.

GMW cannot provide you with information on the current market value of water, however if you decide to proceed with a transfer, information about market activity and pricing can be obtained from your local water broker. Details of brokers in your area can be located in the yellow pages or through advertisements in your local newspaper.

### **What is a winter fill Licence?**

A Surface Water Licence is termed a Winter Fill Licence if it is subject to conditions which limit the extraction of water during a specified period. A Winter Fill Licence entitles the holder to take water to fill a dam, tank or other storage, or apply directly to a crop during the period from 1 July to 31 October in any year. All flow occurring outside of this period must be passed downstream.

### **Do I need to meter my surface water use?**

Currently all new Licences to Take and Use Surface water contain a condition requiring that the pump is metered. Metering of water use is required under Victorian Government policy to improve management of Surface Water resources. Goulburn Murray Water will provide you with the necessary information required to purchase and install a flow meter. The meter can be installed by a licensee or alternatively GMW can carry out the installation. Once a meter is installed it becomes the property of GMW.

**What happens when I lodge my application?**

After you lodge your application GMW will notify you in writing that it has been received. The timeframe to complete an assessment may vary depending on the nature of your application. If delays are expected you will be notified by GMW. When the decision has been made to your application you will be notified in writing of the outcome, either that the application has been approved or refused. Application fees are not refundable if an application is refused.

**Do I need to meet the new Irrigation Development Guideline requirements?**

If the licence being transferred will be used for irrigation an Irrigation Development Guideline Assessment will be required if you intend to:

- irrigate land that has never been irrigated before,
- increase the annual use limit on the land in the current licence, or,
- increase the area allowed to be irrigated in the current licence.

You will be contacted if the Irrigation Development Guidelines apply to you.

**What volume of water is available to the buyer when a permanent transfer is approved?**

The permanent transfer of a licence to take and use water and operate works includes transfer of the licence entitlement for the requested volume from the seller's to the buyer's existing or new licence.

**When can the buyer take and use water under the licence?**

The buyer can take and use water upon written confirmation from GMW that the transfer has been approved subject to the conditions of the licence. Use may be restricted from time to time in accordance with the conditions of the licence.

**Are there ongoing costs associated with having a Licence?**

Yes, a Licence to Take and Use Water and Operate Works is subject to annual fixed charges, issued by GMW in July each year. For specific details about which charges will apply to your licence, please contact the Licensing Unit.

## Additional Application Requirements:

### Aboriginal Cultural Heritage

#### **If I am installing a pump or other works do I have obligations in relation to protecting aboriginal cultural heritage?**

In Victoria, Aboriginal cultural heritage is protected and managed under the Aboriginal Heritage Act 2006 (the Act) and the Aboriginal Heritage Regulations 2007 (the Regulations). Goulburn-Murray Water has an obligation to ensure applicants are made aware of their obligations under this legislation

Under the provisions of the Act a waterway, or land within 200m of a waterway, may be considered an area of cultural heritage sensitivity.

To determine if the site of your proposed works may be in an area of cultural heritage sensitivity you can access an interactive map at: [www.dpcd.vic.gov.au/indigenous/heritage-tools/areas-of-cultural-sensitivity](http://www.dpcd.vic.gov.au/indigenous/heritage-tools/areas-of-cultural-sensitivity)

The installation of new pumps and/or attached pipelines normally occurs on or near a waterway so it is likely that these works may be located in an area of cultural heritage sensitivity.

If works are proposed to be constructed or altered as part of a licence application, applicants need to be aware of their obligations under the Act and its Regulations.

Applicants should also be aware that if your proposal to install (or alter) works meets the criteria for a high impact activity under Regulation 43 of the Act you may be subject to further obligations.

High impact activities include, among other things,

- the installation of any works affecting an area exceeding 25 square metres.
- the works are a linear project that is the construction of a pipeline (of any diameter) with a length exceeding 500 metres; or
- the works are a linear project with a length exceeding 100 metres (with a pipe diameter not exceeding 150 millimetres).

If the construction or alteration of works is considered a high impact activity and occurs in all or part of an area of cultural heritage sensitivity you may be required to prepare a Cultural Heritage Management Plan (CHMP).

You can check whether a Cultural Heritage Management Plan is required by accessing the "Aboriginal Heritage Planning Tool" developed by Aboriginal Affairs Victoria. The interactive online tool will guide you through a series of questions to help you determine your obligations. The website also has information to assist you with contacting the relevant Registered Aboriginal Party or Cultural Heritage Advisor if you require further assistance.

You should access the tool available at <http://www.dpcd.vic.gov.au/indigenous/heritage-tools> and print a receipt of your results for inclusion in your application.

If you do not have access to the internet please contact the Licensing Unit for further assistance.

### Advertising and notifications

#### **Do I have to advertise my application in the newspaper or notify my neighbours(buyer only)?**

After you lodge your application, GMW will notify you in writing if you are required to advertise and/or notify your neighbours. GMW will send out the proforma for advertising and notification to neighbours, this will include a reference number which relates to your application. If the volume sought in the application is greater than 20ML you will be required to advertise and notify neighbours, if the volume is 19ML or less, only notification of neighbours will apply.
