General information and explanatory notes (retain for future reference)

Why do I need to decommission a bore?

Generally a bore/s will need to be removed or decommissioned if it is no longer in use or is beyond repair. If a bore is not decommissioned correctly it may pose a risk to public health and to the long term quality of groundwater resources.

How do I know if my bore needs to be decommissioned?

If you own a bore that is not part of a regular maintenance schedule, it may need to be decommissioned particularly if it is:

- More than 20 years old and not in current use
- Constructed from steel casing
- Damaged or corroded
- Pumping sand
- Yielding saltier/poorer quality water than it has in the past
- Flowing uncontrollably
- Dewatering quickly
- Silted, collapsed or blocked
- No longer needed, or has been replaced by a new bore

GMW can assist you with determining if your bore is beyond repair and/or needs to be decommissioned, and the various methods that can be used to carry out the work.

Why do I need a licence to decommission a bore?

Under the provisions of the *Water Act 1989 (Vic)*, any work conducted on a bore, including the decommissioning of a bore must not be carried out until a Licence to Decommission Works has been issued. Licensing this activity ensures that works are carried out correctly and will not pose any ongoing risks to the public safety or the environment. It also ensures that accurate records are kept in relation to the status of bores across GMW's region.

How much does a licence to decommission works cost?

There is no application fee for a Licence to Decommission Works.

Who can decommission a bore?

In most cases where the bore is shallow and has intersected only a single aquifer system, it is acceptable for the bore owner to carry out the work.

The decommissioning of bores that are deep, flowing or have intersected more than one aquifer system, can be more complex and it is a requirement that the work be undertaken by a suitably licensed driller.

You should contact GMW to determine if you need to engage a licensed driller prior to commencing any works.
