General information and explanatory notes (retain for future reference)

What are the benefits of transferring a Licence to Take and Use Surface water / Groundwater

Transferring surface water or groundwater entitlement provides existing licensed water users with the opportunity to maximise the value of their licence by selling their unused entitlement, and provides others with the ability to purchase water entitlements in areas where new entitlement is not available.

What are the rules relating to the temporary transfer of a licence?

Rules have been established to allow the temporary transfer of entitlement. These rules for transfer are part of the Upper Ovens Water Management Plan which was approved by the Victorian Minister for Water in January 2012. The following general rules apply to temporary transfer of a licence to take and use surface water and groundwater:

- The transfer of entitlement is limited to the term of the current financial year. The transferred volume reverts back to the sellers Licence on 1 July in the following year. Any volume transferred to a licence for one year cannot be transferred on to another licence.
- Temporary transfers are permitted downstream on the same stream, subject to a reduction in the transferred volume of 20%.
- Temporary transfers are permitted upstream or out of catchment, subject to wintertake conditions.
- Transfer of a licence is not permitted to or from farm dams unless there is a standard Licence to Take and Use Water has been issued. A registration licence can be converted to a standard Licence upon request to GMW. Please contact the Licensing Unit for further information.
- If a licence has been issued with a winter-fill condition, it cannot be transferred to a licence which has been issued as an all-year licence.
- All transfers into unregulated sub-catchments are subjected to an assessment against the sustainable diversion limit to determine whether they can be permitted. If your sub catchment is fully committed you will only be allowed to transfer from another licence within your sub catchment.
- Water cannot be used by the buyer until the transfer has been approved and G-MW has notified all parties in writing.
- Transferred entitlement may be restricted or prohibited from being used if there are adverse impacts on other users or the environment.
- If the sellers licence is in operational use, the pumping system must be metered according to GMW's requirements before a transfer can be approved.
- The buyer must have a Licence to Take and Use Groundwater before an application for a temporary transfer can be approved.
- For specific details about trading in the Upper Ovens Water Supply Protection Area refer to the Water Management Plan which is available from www.g-mwater.com.au

How do I know which trading zone and trading rules apply to my licence?

Trading rules have been established under Upper Ovens Water Management Plan. Your licence document lists the management zone applicable to your licence. A copy of your licence can be obtained by contacting the Licensing Unit (fees apply).

Plans and Rules have been established where water resources has been, or has the potential to be, intensively developed. If you intend to apply for a temporary licence transfer you are urged to contact GMW prior to making an application to ensure you have a full understanding of the conditions which apply to the temporary transfer of licence entitlement in your area. For information and maps, please refer to the GMW website at www.g-mwater.com.au/water-resources/ground-water.

Why are there different application fees?

The fee structure reflects the cost of the work required by GMW to assess and determine applications for temporary licence transfers in accordance with its legal obligations.

Tier 1:

Groundwater

An application to transfer a volume which is less than 2ML, or up to 10% of the buyers licence volume, is generally considered to have a lower risk of impacting other users or the environment and only requires a Tier 1 assessment. Note up to 10% of the licence volume is cumulative so an applicant cannot undertake multiple temporary transfers for 10% of their licence volume in the same season under a Tier 1 assessment.

Surface water

An application to transfer a volume to a downstream user on the same stream is generally considered to have a lower risk of impacting other users or the environment and only requires a Tier 1 assessment.

Tier 2:

Groundwater

Applications for transfers greater than 2ML or 10% of the licence volume require a Tier 2 assessment which includes a site inspection and technical assessment.

Surface water

Applications for transfers in which entitlement is to be transferred upstream or off the source stream require a Tier 2 assessment which includes a site inspection and technical assessment.

When assessing an application for the temporary transfer of a licence GMW must consider any impacts on existing authorised users of groundwater and the environment. When the application is lodged it will be assessed initially to determine whether the transfer of water poses a risk of having any adverse impacts at the proposed site where the water will be taken and used.

If this assessment indicates that there is a potential risk of impacting other users or the environment additional information will be required from the applicant. GMW may require that technical investigations, hydrogeological/hydrological assessments and/or pumping tests are undertaken to demonstrate that the proposal will not adversely impact upon existing authorised users and the environment. Completion of this work, if applicable, will be required before the transfer of entitlement is considered. Please note that the costs of any technical work are paid by the applicant. If you are required to undertake such work you will be notified by GMW. A fee may be applicable to review the additional information supplied by the applicant.

Where can I get more information about trading opportunities and current prices in my area?

You should contact the Licensing Unit at GMW to confirm the trading rules applicable to your licence prior to proceeding to locate a buyer or seller.

GMW cannot provide you with information on the current market value of water. If you decide to proceed with an application, information about market activity and pricing can be obtained from your local water broker. Details of brokers in your area can be located in the Yellow Pages or through advertisements in your local newspaper.

What is a Winter-take Licence?

A Winter-take Licence has specific conditions relating to when water can be taken. For an on-stream storage, during the period 1 November to 31 May the entire stream flow must be passed downstream of the licensee's storage. For an off-stream storage, water may only be taken from the waterway to the off-stream storage during the period 1 July to 31 October.

How does G-MW assess the application?

When the application is lodged, GMW will make an assessment to determine if the transfer can be approved under the Upper Owens Water Management Plan. When the application has been assessed, the buyer and seller will be notified of the decision by GMW in writing.

What volume of water is available to the buyer when a temporary transfer is approved?

The temporary transfer of a licence involves the transfer of the requested licence volume from the sellers licence to the buyers for a period of up to one year, and takes into account any restrictions that may be in place.
