

PROJECT UPDATE - NOVEMBER 2020

After a thorough tender process, the Mitiamo Pipeline Project (MPP) team are pleased to announce the award to construct the 360km Mitiamo Pipeline to Mitchell Water Australia Pty Ltd.

Mitchell Water has grown from a small Victorian family business to become one of Australia's largest privately owned pipeline engineering and construction companies. With a focus on safety, quality, efficiency and speed, the MPP team are excited to partner with the experienced Mitchell Water team for the delivery of the Mitiamo Pipeline.

With more than 30 years experience in pipeline engineering, Mitchell Water will tackle the construction with multiple crews along the project alignment who are wasting no time, with shovels in the ground as scheduled this month.

To ensure the construction team are ready to hit the ground running, GMW have procured 270km of the 360km of pipe and fittings for the project. The pipe was manufactured locally in Albury and has been delivered, ready for the crew to get started this month.

Mitchell Water Australia are proud to be awarded to construct the project

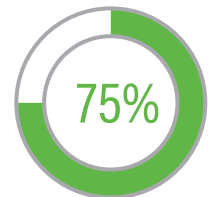

Locally manufactured pipeline stockpiled ready for project construction

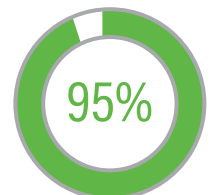

Landowner Agreements

Cultural Heritage Plans Agreed

Pump Station Construction

360km Pipeline Construction

With pipe procured and a contract awarded, the MPP team are very excited to introduce Landowner Liaison Helen Dornom who will be the contact point for landowners along the pipeline as we move into the construction phase.

MPP's Patrick Rochford, and the rest of the MPP team will also be available throughout this project delivery, should you have any questions or queries.

Liaison Helen Dornom & Patrick Rochford

PUMP STATION AND LAGOON NEAR COMPLETION

The Mitiamo Pump Station and Lagoon at the top of the system is almost complete. The pump station shed installation, some fencing and ancillary work still remains to be carried out in readiness for the 360km pipeline to be connected towards the end of the project. Once connected, the Mitiamo Pump Station and Lagoon will under-go testing and commissioning as part of the project completion process.

ASK SANDY

Sandy Schroen from the MPP team has been visiting landowners along the project alignment. In doing the rounds within the community, Sandy has come across some great questions, some of which are answered here:

I've seen survey markers – are they in the right place?

The survey markers have been installed as a starting point based on the original project design, although thanks to landowner discussions we know there may need to be some adjustments made. The Mitchell Water Landowner Liaison will contact you before construction gets underway in your area, this is a great opportunity to ensure there are no further changes required.

Will the construction team notify me before starting work?

Yes, the MPP team and/or the Mitchell Water liaison will be in contact to ensure all parties are on the same page before commencing construction on your property.

How long will the team be working near my property?

Our construction team will be moving carefully but quickly to construct the pipeline. Individual site construction will vary from property to property, dependent upon site conditions and complexity. Your Landowner Liaison will be able to provide you with current information during the construction period.

Who will my contact be during construction?

Your contact during construction will be Helen Dornom, Landowner Liaison from Mitchell Water. It's important to note that MPP's Patrick Rochford and the rest of the MPP team will also be available throughout this project delivery.
